1 Introduction

1.1 Background

In 2008, Derbyshire Dales District Council commenced working with High Peak Borough Council on the preparation of a Joint Core Strategy, that would set out the common planning policies and strategy for the control of development across the whole of the Peak Sub Region (outside the Peak District National park) up to 2026.

However, recent work to assess the latest evidence on the number of houses needed in the Derbyshire Dales and High Peak in the period to 2026 has shown that there are significant differences in the housing markets that operate across the Peak Sub Region. As a result of these differences High Peak Borough Council advised Derbyshire Dales that they no longer wish to pursue the preparation of a Joint Core Strategy. In light of this and advice in the National Planning Policy Framework the District Council will be preparing a new Derbyshire Dales Local Plan to manage development up to 2028.

In order to comply with the requirements of the European Directive 2001/42/EC (the SEA Directive) and to ensure that all plans and policies are prepared in line with the principles of sustainable development, the Derbyshire Dales Local Plan must be subject to a Sustainability Appraisal (SA). The objective of the SA is to assess the potential effects of the plans policies on the environmental, social and economic character of the area which the plan influences.

The Scoping Report is the first stage of the SA process and should set out the evidence and objectives for the Plan to consider and provide baseline information on the environmental, social and economic characteristics of the plan area. The Scoping Report should also set out an appropriate methodology and framework for carrying out the sustainability appraisal of the emerging plans policies and proposals.

A Scoping Report for the Joint Core Strategy was prepared in March 2009 and was based upon baseline data collected in 2008-2009. The Joint Core Strategy Scoping Report and supporting topic papers covered the plan areas of both Derbyshire Dales District Council and High Peak Borough Council, setting out an appropriate framework to assess the preparation of the emerging Joint Core Strategy. The Joint Core Strategy Scoping Report and supporting topic papers are available to view at the following link:

<http://www.derbyshiredales.gov.uk/images/documents/R/Revised%20Joint%20Core%20Strategy%20Scoping%20Report.pdf>

1.2 This Report

In light of the decision to prepare a Derbyshire Dales Local Plan, a review and update of the SA Scoping Report and Topic Papers has been undertaken to address new evidence and ensure the SA Scoping Report covers issues specific to the Derbyshire Dales Plan area. This report updates the baseline information and provides an up to date list of the contextual plans, programmes and strategies that could influence the preparation of the Local Plan. It does not supersede previous part of the SA process, but acts as an additional step to ensure that sustainability issues are up to date and future preparation work on the Local Plan is based on a robust appraisal by the SA process.

This report is an addendum to the SA Scoping Report and should be read in conjunction with the Joint Core Strategy Scoping Report and supporting topic papers (please see the link provided above). This addendum report provides the following:

- New baseline data reflecting recent changes in evidence and information;
- Updated difficulties, uncertainties and data limitations;
- A summary of any key new trends, changes, relevant plans and programmes and issues that have emerged in the authority area since 2008/2009;
- A revised set of sustainability issues and problems identified for the Plan area; and
- A proposed set of revised Sustainability Objectives and an SA Framework (including decision making criteria and monitoring indicators) to ensure the emerging proposals in the Local Plan are assessed against up to date evidence.

1.3 The Approach to the SA

The SA of the local plan is being undertaken in accordance with the requirements of the SEA Directive¹ and following the guidelines set out within the Planning Advisory Services (CLG) Plan Making Manual, which sets out a five staged SA process.

This Scoping Report Addendum is a part of Stage A of the SA process (Scoping) and, together with the 2009 Scoping Report and its accompanying Topic Papers, fulfils the requirements to:

- Identify environmental, social and economic issues and objectives contained in other strategies, plans and programmes that are relevant to the Local Plan area;
- Provide baseline information on the environmental, social and economic characteristics of the area;
- Outline an appropriate framework for carrying out the SA, including objectives, indicators, against which the effect of the plan options and policies will be appraised, mitigated and monitored;
- Meet the requirements of the SEA Directive; and

Feed into and reflect the findings of separate 'Habitats Regulations Assessment' and 'Equalities Impact Assessment'. The requirements of the SEA Directive with regards to Scoping are as follows:

- The environmental consultation bodies are consulted in appropriate ways and at appropriate times on the content and scope of the Environmental Report (i.e. the SA Report). This has taken place through the consultation on the Scoping report in 2009 and through the consultation on this Scoping Report Addendum Report; and
- Technical, procedural and other difficulties encountered are discussed; assumptions and uncertainties are made explicit. These have been identified within the Scoping Report (2009) and within Paragraph 2.17 of this report.

In addition, it is considered best practice to ensure the following during the Scoping stage:

- Reasons are given for eliminating issues from further consideration; and
- The appraisal focuses on significant issues.

¹ European Directive 2001/42/EC

These elements of best practice have both been undertaken through the identification (originally within the Scoping Report, 2009) and updating of the sustainability issues and problems within Table 2.25 of this report.

1.4 Consultation

Consultation is being undertaken on the revised scope and content of the updated SA Scoping Report to ensure that the SA framework, scope and level of detail proposed for subsequent stages of the SA of the Local Plan are comprehensive and to support decisions with regard to the sustainability of the Local Plan. The aim is to ensure that the SA Scoping Report Addendum together with the 2009 Scoping Report and Topic papers provide sufficient information to ensure that a robust and legally compliant SA can be carried out.

The consultation period will be six weeks from 15 March until 26 April 2013. A series of questions are posed below in order to help consultees provide comments on the Scoping Report Addendum. We would be grateful if responses could be structured around the following questions:

1. Have we included all the relevant plans and programmes that are of significant to the Derbyshire Dales Local Plan and sustainability?
2. Can you suggest any other information/facts and figures that may be suitable for inclusion in the baseline information collected for the Sustainability Appraisal of the Local Plan?
3. Have we correctly identified the main sustainability issues?
4. Have we chosen the right sustainability indicators for the Local Plan?
5. Do you think that the Sustainability Appraisal Framework and method for option appraisal is appropriate?
6. Does the scoping report provide sufficient information to ensure that an appropriate SA can be carried out?

The Environment Agency, English Heritage and Natural England have been advised of the updates to the SA scoping report and their comments invited. Other interested parties are also being notified and the relevant documents are available on the Councils website.

Following the 6 week consultation period, the comments received will be consolidated and a table of comments and responses will be developed in discussion with the Council. Once this has been agreed, any further changes and updates will be made to the Scoping Report Update if required.

2 Updated Information

2.1 Introduction

This section is divided into the topic areas in accordance with the Topic Papers of the Joint Core Strategy Scoping Report (2009), which are available to view at the following link:

<http://www.derbyshiredales.gov.uk/images/documents/R/Revised%20Joint%20Core%20Strategy%20Scoping%20Report.pdf>

For each topic, information is provided on any new policies, plans and programmes which are relevant to the Derbyshire Dales Local Plan, the messages / issues identified within each document and any targets set out within them. Any new baseline data is also identified. A summary of any key new trends, changes, relevant plans and programmes and issues that have emerged in the authority area since 2008/2009 is provided. At the end of this section, an updated Table 2 from the Joint Core Strategy Scoping Report (2009) is presented which sets out a revised set of sustainability issues and problems.

2.2 Air, Noise and Light Pollution

2.2.1 Review of other relevant policies, plans and programmes

Table 2.1: Air, Noise and Light Pollution – Updated review of other relevant policies, plans and programmes	
Message / Issue	Source document(s)
International	
Action will be needed at international, EU, national, regional and local levels to make sure air quality and climate change policies are integrated to maximise the co-benefits of tackling both air pollution and climate change	Air Pollution: Action in a Changing Climate; DEFRA 2010.
National	
Planning policies should sustain compliance with and contribute towards EU limit values or national objectives for pollutants, taking into account the presence of Air Quality Management Areas and the cumulative impacts on air quality from individual sites in local areas.	National Planning Policy Framework; DCLG March 2012
Actions that tackle climate change but damage air quality must be avoided.	Air Pollution: Action in a Changing Climate; DEFRA 2010.
Identify and protect areas of tranquillity which have remained relatively undisturbed by noise and are prized for their recreational and amenity value for this reason.	National Planning Policy Framework; DCLG March 2012
By encouraging good design, planning policies and decisions should limit the impact of light pollution from artificial light on local amenity, intrinsically dark landscapes and nature conservation.	National Planning Policy Framework; DCLG March 2012

Air pollution and climate change are closely linked. Co-benefits can be realised through actions such as promoting low-carbon vehicles and renewable sources of energy.	Air Pollution: Action in a Changing Climate; DEFRA 2010.
Through the effective management and control of environmental, neighbour and neighbourhood noise within the context of Government policy on sustainable development: <ul style="list-style-type: none"> • avoid significant adverse impacts on health and quality of life; • mitigate and minimise adverse impacts on health and quality of life; and • where possible, contribute to the improvement of health and quality of life. 	Noise Policy Statement for England; DEFRA 2010

2.2.2 Updated baseline data

Table 2.2: Air, Noise and Light Pollution – New baseline data			
Sustainable development objective	Baseline information	Trend	Indicator / target
To maintain good local air quality and to minimise noise and light pollution.	The District Council published the most recent air quality assessment in April 2011 that has reported good overall air pollution levels across the District. In addition to this, an updating and screening assessment was published in April 2012 ² .	Stable trend.	Number of Air Quality Management Areas.
	An Air Quality Management Area was designated in 2009 as a result of PM ₁₀ and NH ₃ emissions at Cubely poultry farm. An action plan was produced to minimise emissions from this site and the 2012 updating and screening	Local improvement	Number of Air Quality Management Areas.

² 2012 Air Quality Updating and Screening Assessment for Derbyshire Dales District Council; Derbyshire Dales District Council April 2012

	assessment recommended revocation of this AQMA ³ .		
	Lead monitoring at Warren Carr identified a slight increase in lead concentrations compared to previous years, however it is not considered this poses a risk to human health ⁴ .	Slight increase in lead concentrations.	
	There is no updated noise data.	No trend data available	% proportion defined as tranquil ⁵
	There is no updated light pollution information.	No trend data available	

2.3 Biodiversity and Green Infrastructure

2.3.1 Review of other relevant policies, plans and programmes

Improve the long term sustainability of ecological and physical processes that underpin the functioning of ecosystems, thereby enhancing the capacity of ecosystem services.	Making Space for Nature: A review of England's Wildlife Sites and Ecological Network: Chaired by Professor Sir John Lawton CBE FRS: September 2010
Provide accessible natural environments rich in wildlife for people to enjoy and experience.	Making Space for Nature: A review of England's Wildlife Sites and Ecological Network: Chaired by Professor Sir John Lawton CBE FRS: September 2010
Protect and enhance biodiversity through Nature Improvement Areas (NIAs), biodiversity offsetting, Local Nature Partnerships and phasing out peat.	The Natural Choice: Securing the value of nature; HM Government June 2011.
Communities should identify green infrastructure requirements in their local area, through addition to or creative enhancement of the existing network. Look to enhance local landscape character, heritage and biodiversity and ensure long term management is included in an overall strategy.	Local Green Infrastructure: helping communities make the most of their landscape: Landscape Institute for Green Infrastructure Partnership: Sept 2011.
The planning system in England has a central role to play in the protection and restoration of the natural environment.	Planning for a healthy environment – good practice guidance for green infrastructure and biodiversity; TCPA and Wildlife Trusts; July 2012.

2.3.2 Updated baseline data

Table 2.4: Biodiversity and Green Infrastructure – New baseline data			
Sustainable development objective	Baseline information	Trend	Indicator / target
To protect and enhance biodiversity, geo-diversity and to support the development of linked green spaces	Due to boundary changes of existing sites, 37.14 additional hectares were identified as being of sites important for biodiversity over the period 2012/2011 in the Derbyshire Dales. However 5.01 hectares of Lowland Heath land and calcareous grassland were lost as a result of boundary amendments. There were no other reported changes in areas of biodiversity importance during 2010/2011 ⁶ .	Trend is stable.	Core Output Indicators E2 Changes in areas of biodiversity importance Target: To increase areas of biodiversity importance
	Nationally: 19 Priority Habitats (42%) and 88 Priority Species (24%) are believed to be 'declining' or 'probably declining' although the rate of decline is	Biodiversity continues to decline, nationally and locally.	Progress in achieving BAP targets. Local BAP targets are set out

⁶ Derbyshire Dales Local Development Framework Annual Monitoring Report 2010/2011

	<p>slowing for 9 habitats (20%) and 28 species (8%). Eight Priority Species are also reported to have been lost from the UK since the publication of the UK Biodiversity Action Plan (BAP) in 1994⁷. Nearly 500 animals and plants that have become extinct in England – practically all within the last two centuries⁸.</p> <p>The Lowland Derbyshire LBAP review in 2010 identified that 63% of the LBAP targets had been achieved or significantly exceeded, and a further 14% of targets had almost been achieved. However, almost a quarter of targets fell significantly short of being achieved.</p>		<p>within the Lowland Derbyshire Biodiversity Action Plan 2011</p>
<p>To protect and enhance favourable conditions on SSSI, SPAs, SACs and other wildlife sites</p>	<p>A loss of 1.14 hectares of Local Wildlife Sites (also known as Sites of Importance for Nature Conservation) was recorded between April 2008 and March 2011 due to development. This excluded any loss due to agriculture⁹.</p>	<p>Decrease in area of Local Wildlife Sites due to development.</p>	<p>Change in areas designated for their intrinsic environmental value.</p> <p>Target: To increase areas designated for their intrinsic environmental value.</p> <p>PTD 20 Amount of designated Local Nature Reserve in favourable condition</p>
	<p>Nationally: It appears that the target to achieve 95% of SSSI in either 'favourable' or 'unfavourable-recovering'</p>	<p>General trend of improvement in condition of SSSI nationally,</p>	<p>Condition of SSSIs</p> <p>Target: Achieve</p>

Local planning authorities are advised to design their policies to support and not unreasonably restrict renewable and low carbon energy developments.	Planning for Climate Change – guidance for local authorities: Planning and Climate Change Coalition April 2012.
Development management should not prevent, delay or inhibit proposals for renewable and low carbon energy, and associated infrastructure	Planning for Climate Change – guidance for local authorities: Planning and Climate Change Coalition April 2012.
Actions that tackle climate change but damage air quality must be avoided.	Air Pollution: Action in a Changing Climate; DEFRA 2010.
Air pollution and climate change are closely linked. Co-benefits can be realised through actions such as promoting low-carbon vehicles and renewable sources of energy.	Air Pollution: Action in a Changing Climate; DEFRA 2010.

2.4.2 Updated baseline data

Table 2.6: Climate Change – New baseline data			
Sustainable development objective	Baseline information	Trend	Indicator / target
To minimise energy use and to develop the area's renewable energy resource.	The rate of carbon dioxide (CO ₂) emissions in the East Midlands in 2009, at 7.7 tonnes per resident, was slightly above the UK average of 7.4 tonnes per resident ¹² .	While there has been a small increase in renewable energy use in recent years, there will have to be a much greater level of deployment over the next decade in order to meet the target	National Target – 15% ¹³
	In 2011, the area's carbon footprint was higher than average at 10.4 tonnes. This compares to 7.2 tonnes in the East Midlands and 6.8 tonnes in England. Poor access to services, the age of properties and high number of visitors	There is an overall decrease in the carbon footprint between 2009 and 2011	National Targets

¹² Regional Profiles - Key Statistics - East Midlands, August 2012 Office for National Statistics
<http://www.ons.gov.uk/ons/rel/regional-trends/region-and-country-profiles/key-statistics-and-profiles---august-2012/key-statistics---east-midlands--august-2012.html>

¹³ The 2009 Renewable Energy Directive sets a target for the UK to achieve 15% of its energy consumption from renewable sources by 2020.

	could be reasons for this.		
	There were no major renewable energy developments completed in the period 2009-11. However, smaller scale minor renewable energy schemes granted planning permission during that time would result in the production of 0.097MW ¹⁴ .	Stable	Estimated target for renewable energy capacity of 65 GWh/yr by 2026 for Derbyshire Dales District Council Planning Area ¹⁵ .

2.7 Health and Wellbeing

2.7.1 Review of other relevant policies, plans and programmes

Table 2.11: Health and Wellbeing – Updated review of other relevant policies, plans and programmes	
Message / Issue	Source document(s)
National	
Improve public health by strengthening local public health activities which connect people with nature.	The Natural Choice: Securing the value of nature; HM Government June 2011.
Reducing health inequalities is a matter of fairness and social justice. In England, the many people who are currently dying prematurely each year as a result of health inequalities would otherwise have enjoyed, in total, between 1.3 and 2.5 million extra years of life.	Fair Society, Healthy Lives: The Marmot Review: Strategic review of health inequalities in England post 2012
Ensure healthy standard of living for all; Create and develop healthy and sustainable places and communities; and Strengthen the role and impact of ill health prevention.	Fair Society, Healthy Lives: The Marmot Review: Strategic review of health inequalities in England post 2012
Increase healthy life expectancy; and reduce differences in life expectancy and healthy life expectancy between communities.	Public Health Outcomes Framework, NHS, January 2012
Too many children and young people are living in circumstances that make it difficult for them to thrive.	Director of Public Health annual report 2011; Public Health Agency 2011
Local	
There are a number of pathways to bring about better health for all. These include providing more effective treatment for those who are ill, improving access to treatment so that conditions are identified sooner, and providing better care for those who live with an illness. Much more emphasis needs to be placed on prevention. The simple solution to this is about changing lifestyle and, equally importantly, addressing the wider determinants of ill health such as those that stem from socio-economic conditions and environments in which people live and grow up.	Derbyshire's Joint Strategic Needs Assessment; Derbyshire County Council 2008
The Peak District will be a distinctive, high quality rural environment with... ... people of all ages who are healthy and safe; ... high-wage, high-skill jobs; ... affordable, decent homes for local people; ... towns and villages that offer a high quality of life	Sustainable Community Strategy 2009 – 2014; Derbyshire Dales & High Peak LSP Executive April 2009

2.7.2 Updated baseline data

Sustainable development objective	Baseline information	Trend	Indicator / target
To improve health and reduce health inequalities	Regionally: East Midlands had one of the fastest growing populations between 2001 and 2010. People aged 65 and over in the region in 2010 made up 17.1% of the population, compared with 18.2% for the under-16s. This compares with averages for the UK of 16.6% and 18.6% respectively. The proportion in this age group is expected to grow much faster than the total population. The projections show that by 2030, 23.3% of residents could be aged 65 and over. This represents an increase of 59% in the number of people aged 65 and over compared with 49% for England. Life expectancy at birth in the region in the three-year period 2008 to 2010 was 78.4 years for males and 82.4 years for females compared with 78.2 and 82.3 years respectively for the UK ³⁰ .	Above-average population growth is projected to continue, with particularly large growth rates in the older age groups, which could put pressure on healthcare services. 2011 census data shows that the population aged 65 and over increased by 22.3% since 2001 compared with an increase of 15.4% of 0-14 years olds and 62.4% of 15-64 years olds.	Population growth in 65 and over age group. Life expectancy.
	Level of attendances at the District Council's Leisure Centres has improved from 594,852 in 2009/10 to 753,630 in 2011/12 ³¹ . 25.1% of adults participated in sport and active recreation for 30 minutes on 3 or more days a week within the district in 2009/10. LS 13 was formerly the National Indicator NI 8 (percentage of adults who participated in sport and active recreation at moderate intensity for at least 30 minutes on at least 3 days a week).	Upward trend in level of attendances at the District Council's Leisure Centres. Derbyshire Dales continues to have one of the highest participation rates in sport and active recreation in Derbyshire ³² .	Level of attendances at the District Council's Leisure Centres (LS22). Target for 2012/13 is 672,634. % of adults who are participating in sport and active

³¹ Derbyshire Dales District Council Performance Plan and Summary Budget 2012/13

³² Indicator LS13 was formerly the National Indicator NI 8 (percentage of adults who participated in sport and active recreation at moderate intensity for at least 30 minutes on at least 3 days a week). National baseline data was published by Sport England in December 2006 and will be measured thereafter every two years. The most recent results were published in December 2010. Derbyshire Dales remains in the top quartile nationally and continues to have one of the highest participation rates in Derbyshire.

			recreation for 30 minutes on 3 or more days a week (LS13). 2012/12 target TBC by the council.
	The total number of people claiming disability living allowance in the Derbyshire Dales in August 2010 was 2,680, an increase in 80 people compared with August 2009. Most claim durations are 5 years and over. There is a slightly higher percentage of claimants aged 60 and over in the district (21%) compared with the region (17%) and England (16%). However, the number of people claiming incapacity benefit/severe disablement allowance is decreasing and was 1,480 in August 2010 and 1,240 in November 2011. Again, most claims are for 5 years or over. ³³	The number of people claiming disability living allowance has increased steady by between approximately 60 and 100 people each year since 2002. The number of people claiming incapacity benefit/severe disablement allowance has decreased steadily between 2003 and 2011.	Number of people claiming disability living allowance. Number of people claiming incapacity benefit/severe disablement allowance.
	The number of adults accessing NHS specialist mental health services in the district has increased between April 2008 and March 2011. ³⁴	The upward trend in the district is mirrored in the region and in England.	Number of adults accessing NHS specialist mental health services.
	Prevalence of obese children in the district in reception classes and Year 6 is less than the regional and national (England) figures. The prevalence of overweight children in reception classes and Year 6 are slightly higher than the regional and national (England) figures. However, the prevalence of healthy weight children in reception and Year 6 is slightly higher in the district compared with the region and England. ³⁵	Trends for obese children has been relatively stable between 2008 and 2010. The trend of overweight children in reception classes has increased slightly since 2008 Trends for healthy weight children show a slight improvement between 2008 and 2010.	Prevalence of obese, over weight and healthy weight children in the district in reception classes and Year 6.

2.8 Homes for Everyone

2.8.1 Review of other relevant policies, plans and programmes

Message / Issue	Source document(s)
Plan for a mix of housing based on current and future demographic trends, market trends and the needs of different groups in the community.	National Planning Policy Framework; DCLG March 2012
Identify the size, type, tenure and range of housing that is required in particular locations, reflecting local demand.	National Planning Policy Framework; DCLG March 2012
Reduce and Prevent Homelessness in the Peak Sub Region; Provide suitable temporary accommodation for homeless people; Access to independence, settled housing and support; Prevent the loss of and provide access to high quality Private Sector Rented Accommodation; Increase the supply of affordable housing for homeless people Improving monitoring procedures to inform future services and strategies.	Draft Homelessness Strategy 2009-2014; Derbyshire Dales District Council

2.8.2 Updated baseline data

Sustainable development objective	Baseline information	Trend	Indicator / target
To provide everybody with the opportunity of owning (including shared ownership) or renting a sustainably - designed, good quality affordable housing at an affordable cost	Over the 2010/11 monitoring period, 173 net dwellings were completed in the district The number of dwellings estimated to come forward for the five-year period 2011-2016 is 1081 dwellings, whereas the East Midlands Regional Plan Housing Requirements is 1,000 dwellings. The AMR 2010/11 housing trajectory indicates that the housing requirement set out in the East Midlands Regional Plan would be met by 2018	There has been a steady decline in the number of completed dwellings over the last few years.	Number of net dwelling completions.
	The Council has brought forward 105 completed affordable dwellings over the monitoring period 2012/11. The number of affordable housing developments completed over 2010/11	There has been a big reduction reported in the 2010/11 AMR in dwellings granted for affordable	Number of affordable housing completions.

	<p>was 60% of the gross dwelling completions.³⁶</p> <p>In April 2010 the Homes and Communities Agency agreed an Investment Plan with Derbyshire Dales District Council, High Peak Borough Council and the Peak District National Park. It also recognises that local people on low wages face real difficulties in buying market homes and which is exacerbated by wealthier people moving in to the Peak District, attracted by the beautiful countryside and ease of access to cities like Manchester, Sheffield and Derby.³⁷</p>	<p>housing on previous years. Due to funding cuts future delivery rates of affordable housing may be lower over the next few years.³⁸</p>	
	<p>There was a 0.4% decrease in house prices in the East Midlands in 2011, the joint smallest decrease compared with increases of 3.8 and 0.1% in London and the South West respectively. The median house price in the East Midlands in 2009 was £135,000 compared with the England figure of £170,000. In October 2012, Land Registry data shows that the median house price in the region is £122,794, presenting a decrease of 0.1% since 2011. Median house prices in Derbyshire county have also decreased by .03% over the last year to £120,175³⁹.</p> <p>In Derbyshire Dales average property prices decreased over the monitoring period 2010-11 to £237,578 (Apr-June 2011). Average house prices in Derbyshire Dales are significantly higher than that in the East Midlands (£165,006) and the rest of Derbyshire (£158,395) (Land Registry, 2011). Prices of houses in the Derbyshire Dales reflect the attractiveness of the district and their accessibility to local employment⁴⁰.</p>	<p>Property prices in the Derbyshire Dales and the East Midlands are decreasing.</p>	<p>Median property prices.</p>
	<p>The Housing Strategy Statistical Survey (2010) indicated that there are 21,267</p>	<p>No trend data available.</p>	<p>Average size of households.</p>

Conserve heritage assets in a manner appropriate to their significance, so that they can be enjoyed for their contribution to the quality of life of this and future generations ⁴⁸ .	National Planning Policy Framework; DCLG March 2012
The historic environment holds a unique place in England's cultural heritage and supports and contributes to the economy, society and daily life in many ways. The historic environment is a non-renewable resource. Its fragile and finite nature is a particularly important consideration in planning. Conserving this resource for future generations accords with the principles of sustainable development. Government places a priority on its conservation and has set out tests to ensure that any damage or loss is permitted only where it is properly justified.	PPS5 Planning for the Historic Environment, Historic Environment Planning Practice Guide, March 2010
The significance of a heritage asset derives not only from its physical presence and historic fabric but also from its setting – the surroundings in which it is experienced. The careful management of change within the surroundings of heritage assets therefore makes an important contribution to the quality of the places in which we live ⁴⁹ .	The Setting of Heritage Assets; English Heritage 2011
<p>Conservation Principles:</p> <ul style="list-style-type: none"> • the historic environment is a shared resource • everyone should be able to participate in sustaining the historic environment • understanding the significance of places is vital • significant places should be managed to sustain their values • decisions about change must be reasonable, transparent and consistent • documenting and learning from decisions is essential 	Conservation Principles – Policies and Guidance; English Heritage 2008

⁵⁸ Annual Monitoring Report 2009-2010; Derbyshire Dales District Council 2010

⁵⁹ Annual Monitoring Report 2010-2011; Derbyshire Dales District Council 2011

	<ul style="list-style-type: none"> • By 2035 we are projecting an overall per capita consumption reduction of 3.6 litres / head / day; • By2035 we are projecting non-household demand to fall by 95MI/d; • By2035 we are projecting a 144MI/d loss of deployable output due to climate change; • Over AMP5 if we replace mains at the rate needed to maintain serviceability, leakage would still rise by 22 MI/d due to leakage increases from customer supply pipes; • Without our AMP5 water quality strategy we will lose 20MI/d of deployable output as a result of rising nitrate concentrations; and • The Environment Agency’s list of definite Restoring Sustainable Abstraction sites will result in a 1MI/d loss of deployable output by 2035. 	change is likely to lead to a reduction in water that can be supplied by Severn Trent Water.	
--	--	--	--

2.16 Summary of updated baseline information

The District Council published the most recent air quality assessment in April 2011 that has reported good overall air pollution levels across the District. There is no new data available on noise and light pollution.

Biodiversity continues to decline, nationally and locally. When reviewed in 2010, it was found that almost a quarter of LBAP targets fell significantly short of being achieved. A small decrease (1.4%) in area of Local Wildlife Sites due to development has been reported for the Plan area between 2008 and 2011. This does not include any loss that might have occurred due to agriculture. There is a general trend of improvement in condition of SSSIs, nationally, regionally and locally. Most SSSIs in the Plan area have improved in condition since 2008/2009 and the condition of only 1 of 17 SSSI has worsened. There is no additional information available in relation to green infrastructure within the Plan area since the Scoping Report was published in 2009.

Planning policy now encourages local planning authorities to design their policies to support and not unreasonably restrict renewable and low carbon energy developments. It also recognises that air pollution and climate change are closely linked and that co-benefits can be realised through actions such as promoting low-carbon vehicles and renewable sources of energy. The rate of CO₂ emissions in the East Midlands in 2009, at 7.7 tonnes per resident, was slightly above the UK average of 7.4 tonnes per resident⁶⁰. While there has been a small increase in renewable energy use in recent years, there will have to be a much greater level of deployment over the next decade in order to meet the target

A high proportion of residents surveyed are happy with progress on improving the street scene (waste and recycling, street cleansing and parks services) and are satisfied with progress in making the area a safe place to live. Crime within the district continues to be low

⁶⁰ Regional Profiles - Key Statistics - East Midlands, August 2012 Office for National Statistics
<http://www.ons.gov.uk/ons/rel/regional-trends/region-and-country-profiles/key-statistics-and-profiles---august-2012/key-statistics---east-midlands--august-2012.html>

and most notifiable crimes recorded within the area have decreased over the last 3 years. Anti-social behaviour is the key issue in relation to recorded crimes within the larger settlements in the district. Encouraging more market housing developments to seek to achieve the Secured by Design award could be a target for planning policy.

The working age population in the district has increased since 2006. Economic activity and employment rates continue to be higher in Derbyshire Dales than the regional or national percentages and the district also has a smaller proportion of unemployed people compared with the regional and national proportions. In the year ending September 2011, the lowest unemployment rate of all local authorities within the East Midlands was 4.0% in the Derbyshire Dales. Economic activity rates in the district have increased since 2006 but so have unemployment rates. Gross weekly earnings for residents of the district have decreased from £560.90 in 2009 to £523.50 in 2011. Jobs density in Derbyshire Dales has also decreased since 2005.

Above-average population growth is projected to continue in the region, with particularly large growth rates in the older age groups, which could put pressure on healthcare services. In the Derbyshire Dales, the rate of increase in population in the 65 and over age group was 22.3% between 2001 and 2011. This is similar to Staffordshire Moorlands (21%) and North East Derbyshire (21.1%) but is higher than other local authorities within the East Midlands region. The number of people claiming disability living allowance in the district is increasing as are the numbers of adults accessing NHS specialist mental health services in the district, however, this is also a regional and national trend. The trend of overweight children in reception classes has increased slightly since 2008; however, trends for healthy weight children show a slight improvement between 2008 and 2010. There is an upward trend in level of attendances at the District Council's Leisure Centres. Derbyshire Dales continues to have one of the highest participation rates in sport and active recreation in Derbyshire. It should be noted that more data relating to health should become available from the 2011 census.

Derbyshire Dales and High Peak are the top two districts in Derbyshire for participation in sport and active recreation for 3 x 30 minute sessions per week (24.4% and 24.7% respectively) compared to 22.1% in the East Midlands and 22% in England.

There has been a steady decline in the number of completed dwellings over the last few years however the district council does have a 5 year housing supply. There continues to be a high percentage of houses being built on Previously Developed Land within the district. Property prices in the Derbyshire Dales and the East Midlands are decreasing. However, average house prices in Derbyshire Dales are significantly higher than that in the East Midlands and the rest of Derbyshire. Prices of houses in the Derbyshire Dales reflect the attractiveness of the district and their accessibility to local employment. Access to affordable housing continues to be a problem within the district. 38 affordable dwellings within the Local Planning Authority Area were completed over the monitoring period 2011/2012. There were no planning permissions granted for dwellings on rural exception sites during the monitoring period 2011/2012. However of the 38 affordable dwellings completed, 33 dwellings were completed for affordable housing on rural exception sites.

The East Midlands Regional Landscape Character Assessment was published in 2010 which sets out a strong understanding of the character of the East Midlands Region, along with guidelines specifically designed to enhance the landscape for the benefit of all. This provides a stronger basis to direct positive change. Development on previously developed

land continues to be high showing only a slight decrease from the period 2009-10 to the period 2010-11.

One additional Conservation Area has been declared and four additional Conservation Area Appraisals have been completed in the Derbyshire Dales since 2009. There has been a decrease in the number of buildings on the local register of historic buildings at risk, from 41 in 2010 to 35 in 2012 which indicates an improving trend. The data suggests that each year a large proportion of planning applications will be received in the district where the historic environment is a material consideration. Applications are being refused on the basis of adverse impacts on the historic environment, adverse impacts upon a conservation area and adverse impacts upon a listed building. However, some applications may be granted planning permission on appeal.

A Strategic Transport study reported in 2010⁶¹ has analysed the sustainability of settlements within the district and identified traffic hotspots. The study suggests the following hierarchy of highway mitigation measures in order to ensure that the preferred housing development locations are sustainable with regards to travel:

- Siting and Development Style
 - Potential to create an appropriate access onto the local highway network,
 - Mixed-use development, or development near to existing services and facilities,
 - Development layout that encourages sustainable modes,
 - Provision of sustainable transport infrastructure within a development,
- Management of Trips
 - Travel Plan (with provision for measures and monitoring),
- Single Occupancy Trip Reduction Measures
 - Car sharing,
 - Public transport contributions,
- Highway Improvements.

It should be noted that further data should become available once 2011 census data relating to transport indicators is published. New data with regards to this topic is limited in the meantime.

The Preliminary Flood Risk Assessment for Derbyshire produced in May 2011 has identified localised areas of Derbyshire to be at risk of surface water flooding, however no new flood risk areas have been identified.

2.17 Sustainability Issues and Problems

Presented below is an updated Sustainability Issues and Problems table (which appeared as 'Table 2' within the Joint Core Strategy Scoping Report (2009)). Table 2.25 below has been updated using the information presented in Sub-sections 2.2 to 2.12. Additions to Table 2.25 are identified in **bold text** and deletions are shown with ~~strikethrough text~~.

⁶¹ North Derbyshire Local Development Frameworks: High Peak and Derbyshire Dales Stage 1: Strategic Transport Issues Report (Scott Wilson, 2010)

Table 2.25: Updated Sustainability Issues and Problems	
Sustainability Issues	Evidence
Shortage of local jobs, particularly in high skill / high wage positions.	Employment and Economy Topic paper
There is a need to improve the range of job opportunities across all sectors and contribute to the development of sustainable communities.	Employment and Economy Topic paper
Many young people are forced to move away from the area because of high house prices and lack of affordable housing.	Employment and Economy Topic paper
In order to maintain the growth of the local economy, identified land and premises needs to be complemented by a workforce that has the necessary range of skills to meet the needs of existing sectors.	Employment and Economy Topic paper
There is a high-commuting which exacerbates the tight labour supply in the area and inhibits business growth.	Employment and Economy Topic paper
High quality town centre environments are a vital factor in ensuring that people shop locally.	Employment and Economy Topic paper
Development within the Core Strategy area risks an impact on wildlife and nature conservation. Measures must be taken for biodiversity enhancement, mitigation and protection.	Biodiversity and Green Infrastructure Topic Paper
Green corridors should be created, extended and promoted to help improve non-car based linkages to local facilities and services.	Biodiversity and Green Infrastructure Topic Paper
There is a need to consider and plan for the impacts of climate change on species and habitats.	Biodiversity and Green Infrastructure Topic Paper
Development on greenfield land.	Biodiversity and Green Infrastructure Topic Paper
Creation of new natural environmental sites.	Biodiversity and Green Infrastructure Topic Paper
Development needs to be resilient to the effects of climate change.	Climate Change Topic Paper
The Core Strategy should address the need to increase energy efficiency and the use of renewable and low carbon technologies.	Climate Change Topic Paper
There is a high proportion of stone built properties that are difficult to insulate. The high quality landscapes are highly sensitive to a number of renewable energy technologies.	Climate Change Topic Paper
Car ownership in the area is above average because of its rural nature.	Climate Change Topic Paper
The build heritage of the area plays a vital role in defining its distinctive character and identity and it should be protected.	Historic and Cultural Heritage Topic Paper
The plan needs to ensure that changes that take place in the Core Strategy area do not destroy its valued historic assets or its distinctive character.	Historic and Cultural Heritage Topic Paper
The Core Strategy area has a range of landscape character types which all contribute to local distinctiveness and this need to be protected and enhanced.	Landscape Character and Natural Resources Topic Paper

Sustainability Issues	Evidence
The landscape of the Core Strategy area offers an important resource for health, leisure and tranquillity.	Landscape Character and Natural Resources Topic Paper
Areas which currently exist as undeveloped floodplain, and any natural flood storage should be safeguarded.	Water Resources and Flood Risk Topic Paper
The Sequential Test should be used to locate development in least risk areas.	Water Resources and Flood Risk Topic Paper
The use of SUDs should be required in all flood zones for both brownfield and greenfield sites.	Water Resources and Flood Risk Topic Paper
Car ownership is above average and the majority of journey to work are by car.	Transport and Accessibility Topic Paper
In large parts of the area it is difficult for residents to access key services by walking, cycling or public transport.	Transport and Accessibility Topic Paper
Interchanges and connections between different public transport services are perceived to be weak.	Transport and Accessibility Topic Paper
Life expectancy is above average, but varies according to wards.	Health and Wellbeing topic papers
There are higher level of obesity than the England Average	Health and Wellbeing topic papers
Large increases in the number of older people are predicted by 2031, with the biggest rises predicted in those aged 65-69 and over 85 years.	Health and Wellbeing topic papers
Crime levels are low in comparison with county and national averages but public concern is significant, with 48% of people in High Peak and 36% in Derbyshire Dales very, or fairly worried about it.	Community Safety and Neighbourhood Topic Paper
There is a shortfall to play provision for children over twelve.	Community Safety and Neighbourhood Topic Paper
There is a high incidence of second home ownership. This can make it increasingly difficult for people to afford housing.	Homes for Everyone Topic Paper
House prices are above national averages making it difficult for first time buyers and those on low incomes to afford homes.	Homes for Everyone Topic Paper
The supply of entry level properties is low.	Homes for Everyone Topic Paper
There is a low proportion of rented housing stock.	Homes for Everyone Topic Paper
Existing good air quality should be protected.	Air, noise and light pollution Topic Paper
The area considered to be tranquil is declining and the area covered by light pollution is increasing.	Air, noise and light pollution Topic Paper
There are higher than average rates of sports participation.	Leisure and recreation Topic Paper

Table 2.25: Updated Sustainability Issues and Problems

Sustainability Issues	Evidence
There is a need for investment with Buxton, New Mills and Glossep to improve sports provision.	Leisure and recreation Topic Paper
Current provision of allotments is not meeting the high demand.	Leisure and recreation Topic Paper

3 Sustainability Appraisal Framework

3.1 Introduction

The following table sets out the SA framework which was developed for the High Peak and Derbyshire Dales JCS SA. This has been reviewed in light of the updated policy reviews and baseline data undertaken for Derbyshire Dales.

It is considered that only minor changes to the framework are necessary to ensure that the SA will be based on the most recent baseline information and specifically related to the issues within Derbyshire Dales.

The table has been amended below with any suggested additions to the SA framework identified in **bold text** and any deletions shown with ~~strikethrough text~~.

	Sustainability Appraisal	Decision Making Criteria	Indicator
1	To support the development of a local economy based on high-skill and high-wage jobs; including by the delivery of the necessary premises, sites and infrastructure.	<ul style="list-style-type: none"> • Will it increase the quality and choice of local employment? • Will it support the growth of higher skilled economic sectors (knowledge and creative industries)? • Will it result in more highly paid, highly skilled local jobs within the area and thus reduce commuting out of the area? • Will it provide employment land in areas of short supply? • Will it provide attract sites for modern businesses? • Will it promote sustainable design and construction of employment sites and premises? 	<ul style="list-style-type: none"> • NI 171 New business registration rate • NI 172 Percentage of small businesses showing employment growth • Average full time wage • Number of people with NVQ level 2 qualification and number of people qualified to a leave NVQ level 4 • Gross weekly earnings • Rate of employment development within the district • Unemployment rates • Jobseekers Allowance claimants • Jobs density • Business Starts / Enterprise Births and Business Closures / Enterprise Deaths • Employment by SOC group
2	To support the development of attractive, vibrant and distinctive town centres.	<ul style="list-style-type: none"> • Will it help to support the diversity and vitality of town centres? • Will it reduce the number of people travelling out of the area for retail and leisure? • Will it encourage the use of locally sourced services and products in the economy 	<ul style="list-style-type: none"> • Percentage of occupied shop Premises • Percentage increase in satisfaction with town centres
3	To encourage tourism development and to promote the area as a tourist destination.	<ul style="list-style-type: none"> • Will it lead to an increase in the number of people staying overnight in the area? • Will it lead to an increase in visitor spend in the area? 	<ul style="list-style-type: none"> • % increase in visitor spend • % increase in the number of overnight visitors

	Sustainability Appraisal	Decision Making Criteria	Indicator
4	To maintain good local air quality and to minimise noise and light pollution.	<ul style="list-style-type: none"> • Will it maintain or improve local air quality? • Will it minimise light pollution? • Will it reduce the extent of the area defined as 'tranquil'? 	<ul style="list-style-type: none"> • Number of air quality management Zones • Number of Air Quality Management Areas • % proportion of land defined as tranquil
5	To protect and enhance favourable conditions on SSSIs, SPAs, SACs and other wildlife sites.	<ul style="list-style-type: none"> • Will it protect and promote effective management of SPAs and SACs in the CS area and its surrounds? • Will it help to protect and enhance other designated sites e.g. SSSIs, County Wildlife Sites, LNRs etc? • Will it help to deliver the findings of the Appropriate Assessment? 	<ul style="list-style-type: none"> • % of internationally and nationally designated sites in 'favourable' or 'unfavourable recovering' condition. • Area (ha) of SSSIs and Local Wildlife Sites lost to development requiring planning permission. • Increase in areas of biodiversity importance
6	To protect and enhance biodiversity, geo-diversity and to support the development of linked green spaces.	<ul style="list-style-type: none"> • Will it conserve and enhance habitats in the Biodiversity Action • Plan? Will it maintain or enhance (rural and urban) tree cover? • Will it conserve and enhance species diversity and in particular avoid harm to protected species? • Will it protect geo-diversity? • Will it improve the ecological quality and character of open spaces? • Will it help to provide links between green spaces or help to deliver/support other green infrastructure? 	<ul style="list-style-type: none"> • National Indicator 197 Proportion of Local Wildlife Sites where positive conservation management has been or is being implemented • Number of Planning permissions granted against the advice of Natural England • % of local Biodiversity Action Plan targets met
7	To minimise energy use and to develop the area's renewable energy resource.	<ul style="list-style-type: none"> • Will it help to minimise energy use and encourage energy efficiency in new and existing buildings 	<ul style="list-style-type: none"> • National Indicator 186 Per capita carbon dioxide emissions in Local

	Sustainability Appraisal	Decision Making Criteria	Indicator
		and infrastructure? <ul style="list-style-type: none"> • Will it lead to a higher proportion of buildings with sustainable design features? • Will it lead to an increased proportion of energy produced and supplied from renewable sources, (including on-site)? • Will it help to reduce the amount of travel by car and increase the proportion of journeys by sustainable modes of travel? 	Authority area <ul style="list-style-type: none"> • Proportion of properties achieving level 4 or above Code for Sustainable Homes status (residential) and / or BREEAM very good (non residential) • Amount of energy produced from renewable energy sources (mw) • Renewable energy capacity of 65.85 GWh/yr by 2026 for Derbyshire Dales District Council Planning Area • The amount of development within 15 minutes walking distance (1km) and 10 minutes cycling distance (2km) of the town centres, and/or located within 400m of a high frequency bus route and/or 800m of a railway station.
8	To conserve and enhance town / village –scape quality; archaeological and heritage assets along with their settings.	<ul style="list-style-type: none"> • Will it respect, maintain and strengthen local distinctiveness and sense of place? • Will it promote high quality urban and rural design? • Will it preserve or enhance heritage assets and their settings? • Will it preserve or enhance archaeological remains and their settings? • Will it preserve and enhance the character or appearance of conservation areas and their settings? 	<ul style="list-style-type: none"> • Number of buildings of historic or architectural interest renewed and reused • Impact of change on the character or appearance of conservation areas • % or areas of historic buildings, sites and areas including locally listed assets affected, whether in an adverse or beneficial way • Number of planning applications affecting sites designated for historical interest • Number of historic assets at risk. • LO15 - Amount of Development

Table 3.1: Revised SA Framework			
	Sustainability Appraisal	Decision Making Criteria	Indicator
			having an adverse impact upon the Historic Environment
9	To protect and enhance the character and appearance of the landscape, including cultural landscape assets, as well as the area's other natural assets and resources.	<ul style="list-style-type: none"> • Will it protect and enhance landscape quality, character and distinctiveness? • Will it avoid loss of - and damage to - the best agricultural land? • Will it make use of previously used / brownfield land and buildings? • Will the proposal contribute to environmental resources? • Will it protect and improve the quality of water resources such as rivers, canals, ponds, wetlands and groundwater? • Will it conserve and enhance green infrastructure and open space, as part of a landscape character approach, making the area a more attractive place to live, visit and do business? 	<ul style="list-style-type: none"> • % of development having an adverse impact on landscape character • Amount of development having an impact upon best and most versatile agricultural land • % of development completed on brownfield land Previously Developed Land • Indicator to be developed on open space following adoption of the joint High Peak and Derbyshire Dales Open Space Strategy • National Targets for open space provision and quality.
10	To ensure sustainable management of water resources and to minimise the risk of flooding.	<ul style="list-style-type: none"> • Will it encourage water efficiency and demand management? • Will it support the use of Sustainable Urban Drainage Systems? 	<ul style="list-style-type: none"> • Number of planning applications granted contrary to the advice of the Environment Agency • Water Framework Directive Targets. • Number of Flood Risk Areas • Per capita water consumption.
11	To reduce the number of journeys made by car - within, and to and from - the area.	<ul style="list-style-type: none"> • Will it help to meet local needs locally? • Will it support safe walking and cycling? • Will it support the use of public transport? • Will it deliver opportunities to relieve traffic 	<ul style="list-style-type: none"> • The amount of development within 15mins walking distance (1km) and 10 minutes cycling distance (2Km) of the town centres and/or located within 400m of a high frequency bus route

			<ul style="list-style-type: none"> • Recorded notifiable crimes.
15	To provide everybody with the opportunity of owning (including by shared ownership) or renting a sustainably- designed, good quality home at an affordable cost.	<ul style="list-style-type: none"> • Will it contribute to the viability and sustainability of urban communities? • Will it contribute to the viability and sustainability of rural communities? • Will it support a range of housing types and sizes, including affordable housing units and “Lifetime Homes”, to meet all needs? • Will it contribute to managing our contribution to climate change? 	<ul style="list-style-type: none"> • National Indicator 155 Number of affordable homes delivered • Number of net dwelling completions. • Number of affordable housing completions. • Median property prices. • Average size of households. • Dwelling Size, No of Bedrooms • Net additional Gypsy and Traveller pitches.
16	To provide better opportunities for people to participate in cultural, leisure and recreational activities.	<ul style="list-style-type: none"> • Will it provide increased opportunity for engagement in indoor and / or outdoor leisure activities for all? • Will it provide opportunities for engagement in a range of cultural activities? • Will it support the development of a vibrant cultural economy? • Will it improve the condition of public open spaces? • Will it help to improve access to sports facilities? 	<ul style="list-style-type: none"> • % increase in the levels of participation by young people in sport, active recreation and cultural activities

4 Next Steps

Following the 6 week consultation period on this SA Scoping Report Addendum, the comments received will be consolidated and responses will be developed in discussion with the Council. Any required amendments will then be made to the Scoping Report Addendum in response to consultation comments received.

The methodology for assessing the next stages of the Local Plan preparation and preferred options will follow the proposed methodologies set out in the Scoping Report (2009) and will use the revised SA Framework set out within this report (with any necessary amendments made following consultation).

Further information about the Local plan preparation process can be obtained from the following link: <http://www.derbyshiredales.gov.uk/planning-a-building-control/planning-policy/local-plan>
